

## 3P Watering Post granitic

Art.-Nr. 8000810

### Description:

The 3P Watering Post allows the user to draw water in the garden comfortably and easily. Ideally suited also in conjunction with a rainwater plant for watering the garden. The pump can be used as water supply and you can withdraw the collected water from the tank. The watering post, which is 90 cm high, is made of first-class plastic.

The water supply is guaranteed through a normal hose connector system.

The watering post is UV-resistant and weather-proof. Naturally, before beginning of frost it has to be drained.

The watering post can be screwed on a firm base or it can be placed directly into the ground.

Equipped with a 1/2" tap. The input is made through a 1/2" connection for hose connector systems.

### How it works:

Watering post with tap, ready for connection of a normal hose connector system.

### Technical Data:

90 x 12 x 12 cm

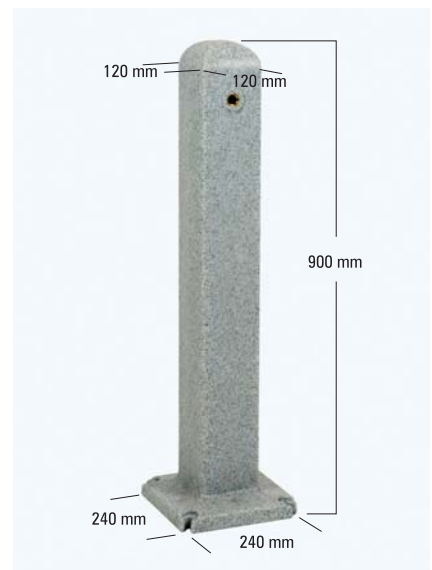

Water connection height 80 cm

Bottom plate 24 x 24 cm with 4 boreholes, so the watering post can be screwed on a firm base.

Material: Polyethylen

1/2" tap, chromised, monted on a plate of stainless steel.

Weight: 3,3 kg
